I must say that when I received my copy of this book, I didn't expect to learn that much. After all, since it only has 55 or so pages, how could I learn much from it? One thing I realized after I got into this book, I had trouble putting it down. This book is full of learnings for both TOC "old timers" like me and "newbies" who are just learning about the Theory of Constraints! If I had to recommend one book for people just learning about TOC, it would be this book! But having said that, there are lessons to be learned for those who think they know everything about TOC! This gem is full of lessons from a variety of industries, from service and manufacturing companies and it's written in such a simple way. All I can say is, "Great job Clarke!"

Bob Sproull

It's brilliant Clarke.

You have succeeded in making the essence
of the goal more accessible and relevant.

THE GOLDRAT INVESTMENT

30th Anniversary Edition

THE PROCESS OF CONSTRUCTING A BUSINESS

Eli Goldrat has been described by *Fortune* as a "guru to industry" and by *Business Week* as a "genius". His book, *The Goal*, is a gripping fast-paced business novel.

"Goal readers are now doing the best work of their lives."
Success Magazine

"A factory may be an unlikely setting for a novel, but the book has been widely effective..."
Tom Peters

OVER 6 MILLION COPIES SOLD!

THIRD REVISED EDITION

“Do you have a
bottleneck?”

Libby

How does your process work??

It has 5 steps:

1. Bla.
2. Bla bla.
3. Bla bla bla.
4. Bla, and,
5. Print the cheques.

How many invoices can each step do each day??

You should read this book!

I don't
read
many
books

20 years pass

New Zealand

But I want to use TOC to change the WORLD.

TOC

Am I a TOC fraud, Georgie?

- I've never told anyone about the scout hike
- I've never explained DBR to anyone, except university students
- I've only ever once used product cost. And I've only once been inside a factory.
- I've never played the dice game. I've never needed to use the terms statistical variation and dependent events.
- I've hated the wording of the 5FS.
- I've given up recommending The Goal (even though it's the best book in the world, ever)
- I have helped hundreds of people find, then manage, their bottleneck by ...
- Telling them about Sinead and Eve.
- Telling them about my friend Gary.
- Telling them a joke about some buffalo ...

A close-up photograph of a man with glasses and a beard looking at a black and white dog. The dog is wearing a blue collar with a silver ring. A speech bubble is positioned above the dog's head.

Buffalo??????

A close-up photograph of a man with glasses and a beard looking at a black and white dog. The man is on the left, and the dog is on the right. A speech bubble is positioned above the dog's head.

**Tell me about the
buffalo!**

The Buffalo Story started out as an email joke.

An imagined conversation between Norm and Cliff, from “Cheers”, the TV Show.

image: wikipedia

Well, you see, Norm, it's like this.

A herd of buffalo can only move as fast as the slowest buffalo.

The slowest buffalo stays at the back and the faster buffalo run in front, but at the slower speed.

Otherwise, the herd would split apart.

Like this.

**And when they were split apart they were prone to
attack by wolves.**

Evolution favoured the herds that didn't spread apart.

When these tightly packed herds were hunted, the wolves killed the slowest and weakest buffalo.

The guys at the back.

That made the remaining herd stronger and faster.

Here's the JOKE Bit.

In much the same way, the human brain can only operate as fast as the slowest brain cells.

[Hmmm ...]

Now, as we know, excessive intake of alcohol kills brain cells.

But naturally, it attacks the slowest and **weakest** brain cells first.

In this way, regular consumption of beer eliminates the weaker brain cells, making the brain a faster and more efficient machine.

And that, Norm, is why you always feel smarter after a few beers.

**And, your friend Gary.
Have I met him?**

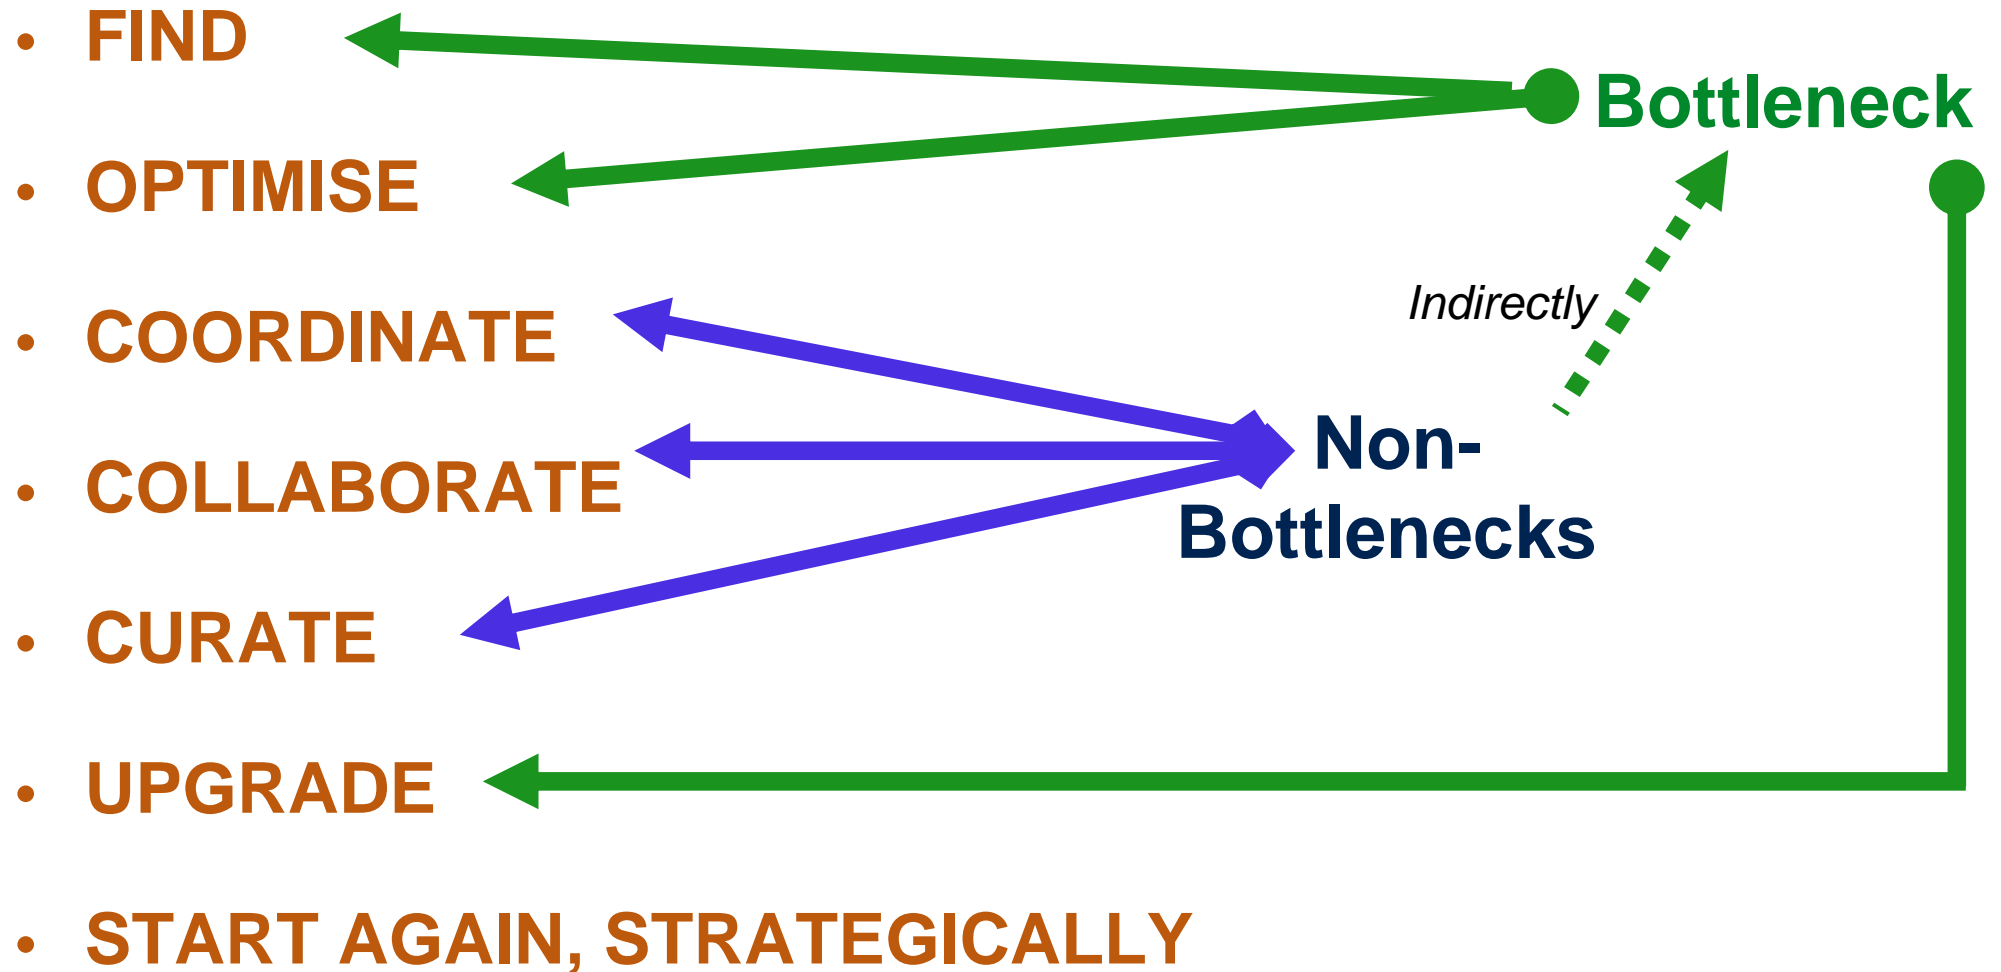

- Rule 1. Don't let the engine run out of fuel**
- Rule 2. Don't put too much fuel in the tank**
- Rule 3. Don't put poor quality fuel in the tank.**

A close-up photograph of a man with glasses and a beard looking at a black and white dog. The dog is wearing a blue collar with a silver ring. A speech bubble is overlaid on the image, pointing to the dog.

Anything else?//

FOCCCUS Recipe

A close-up photograph of a man with glasses and a beard looking at a black and white dog. The dog is wearing a blue collar with a tag. A speech bubble is overlaid on the image, containing the text "You should write a book." The background is a light-colored, textured surface.

**You should write a
book.**
